1. BIOMODEL<sub>4</sub>REGIONS blueprint
2. Blueprint development methodology
3. Key steps for developing the blueprint
4. Benefits from developing the blueprint
5. Testing the blueprint methodology

# BIOMODEL4REGIONS blueprint

Source: ICLEI Europe

- The **blueprint** for a Regional Bio-Based Economy Strategy is one of the key Biomodel4Regions project initiatives to support the regional governments, bio-based clusters, and businesses in their transition to a circular and low-carbon economy
- The **development of the blueprint** for a Regional Bio-Based Economy Strategy is a structured approach to create, implement, and evaluate a long-term plan on using renewable biological resources from land and sea

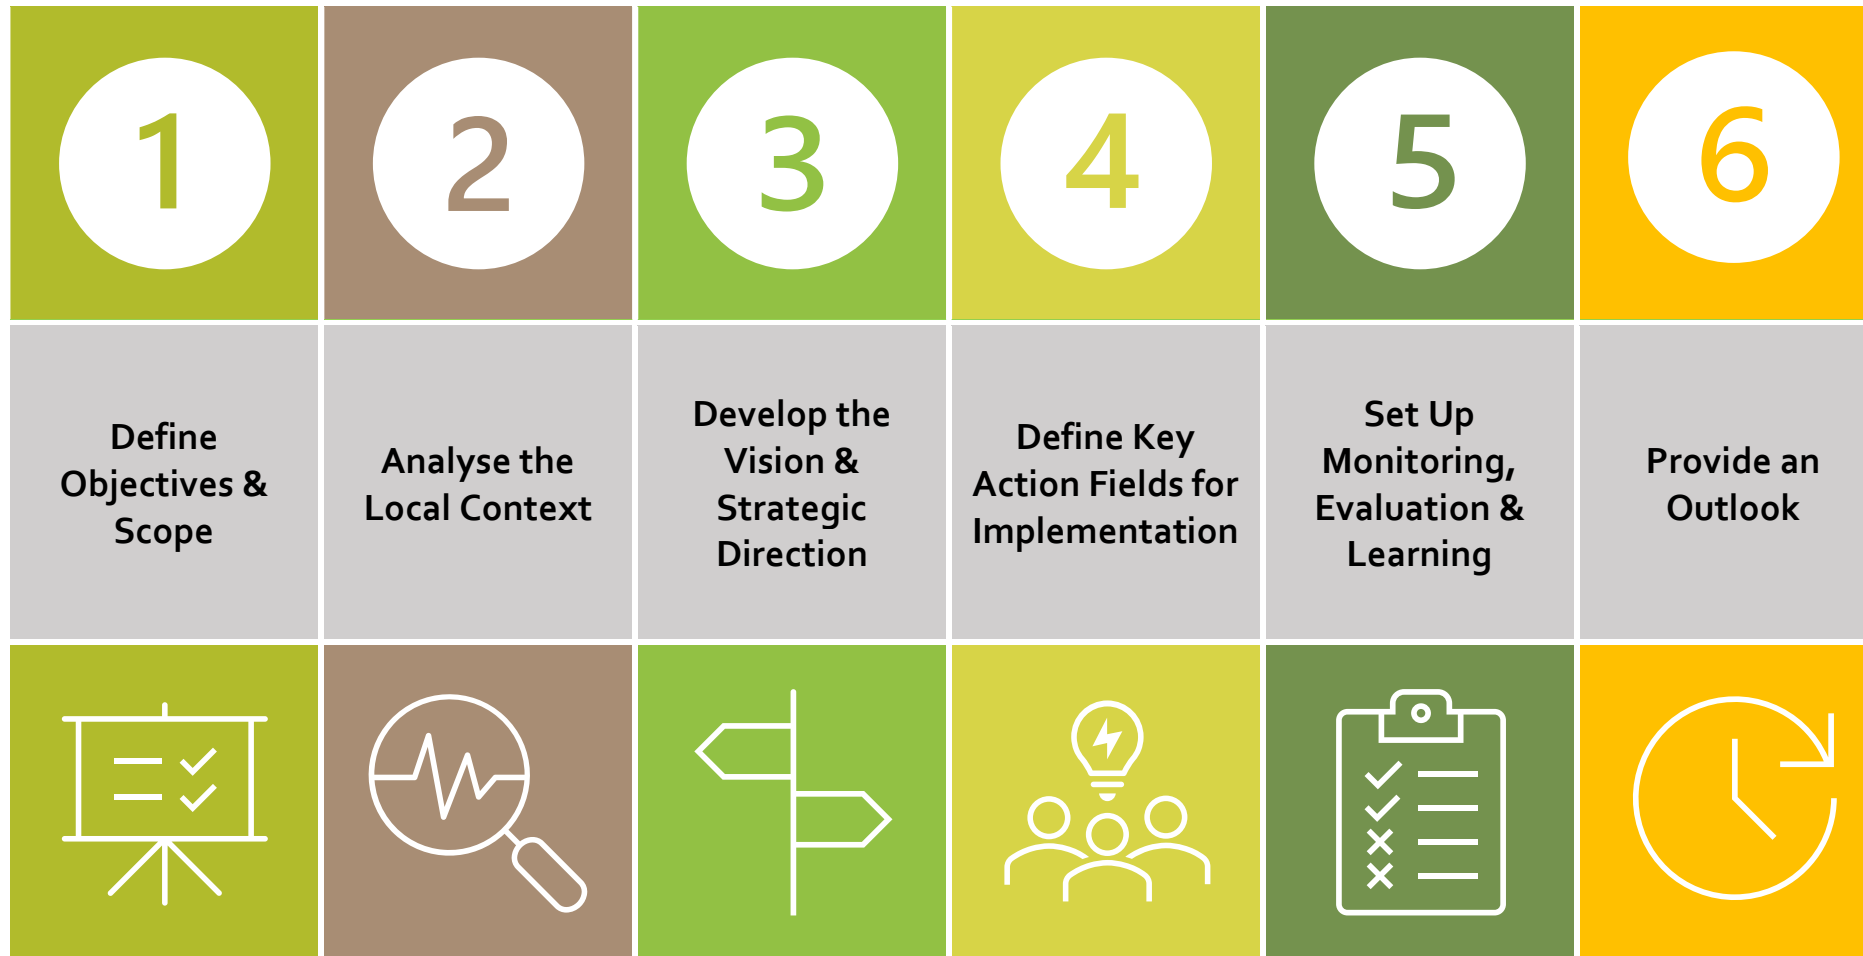

Circular Regions - 15 April 2025

# Blueprint development methodology

- It is inspired by the ICLEI – Local Governments for Sustainability [Green Climate Cities](#) programme
- It is built on the Biomodel4Regions project created knowledge – methodologies and tools, and the application of that knowledge assets in practice
- It relies on the key principles of collective and innovative knowledge co-creation, that requires active engagement of all relevant stakeholders

# Key steps for developing the blueprint

# Benefits from developing the blueprint

	<b>Economic Growth and Job Creation</b>		<b>Enhanced Agricultural and Rural Development</b>
	<b>Sustainable Resource Management</b>		<b>Improved Public Health</b>
	<b>Environmental Benefits</b>		<b>Stronger Regional Identity and Collaboration</b>
	<b>Improved Energy Security and Sustainability</b>		<b>Resilience to Climate Change</b>
	<b>Regional Competitiveness and Innovation</b>		<b>European Union and National Policy Alignment</b>
